- Last summer, I volunteered 15 days long NOP SCS.
- It provides an opportunity for underprivileged students to join LUMS

Research Intern - CSaLT LUMS

Jan 2023 - Present

- I am conducting research in ML in [Dr Agha's](#) Lab.
- It revolves around machine learning models for investigation lab.

PROJECTS

Consuming Public API to make a Weather App - [View Project](#)

2022

- Developed a responsive Weather App using HTML, CSS, JavaScript and Public APIs.
- Consumed [Weather API](#) to display weather of the selected city.

Todo List website - [View Project](#)

2022

- Developed a responsive website where you can add, mark or delete your everyday tasks
- It's made using web technologies like HTML, CSS and Vanilla JavaScript
- Recently installed Local storage so you tasks remain save.

Facegram - [View Project](#)

2022

- Built a scalable full stack web application where you can make friends around the globe, share post and chat.
- Implemented using MERN stack however, MySQL is used instead of MongoDB.
- Comes with an in built messenger app which is implemented using [socket.io](#) .
- Initially hosted on AWS and is made resilient to system crashes using pm2, therefore had 100% up time.

Library Management System - [View Project](#)

2022

- A group project where we buit a scalable Management System for Libraries
- Implemented using MERN stack however, MySQL is used instead of MongoDB.
- You can all provide/avail all library services using our software, remotely.
- Initially hosted on AWS and is made resilient to system crashes using pm2, therefore had 100% up time.

GLobal Gossip - [View Project](#)

2023

- A front-end application where you can post your daily Gossips and react to others
- Impelled using React (Typescript) and backend in [Firebase](#)
- Currently hosted using firebase.

ADDITIONAL SKILLS

- I have almost one and half years of experience in web development and have made numerous Projects.
- I am skilled in **Python**, JavaScript, **ReactJS**, Typescript, Nodejs, **ExpressJS**, C+ +, MATLAB, **Tailwind**, HTML5, Firebase.
- I am also adept at various machine learning libraries, i.e., **pandas**, sklearn, **numpy** and matplotlib.
- Decision Making & Problem-Solving Data Analysis.
- Logo and Poster Designing.

EXTRA & CO-CURRICULAR ACTIVITIES

- Event head for Bethak – LLS flagship event.
- Head the 2022 orientation of LUMS Literary Society.
- Coordinated with 2 colleagues and arranged a Scavenger hunt for fellow students.

INTERESTS

- Web Development, Machine Learning, Logo and Poster Desgning.
